

AIRMASTER ULTRA

AIR PURIFICATION SYSTEM

Get cleaner, fresher air in every room of your house.

The AirMaster Ultra Air Purification System reduces airborne contaminants to help your home smell cleaner and feel fresher.

Purify Your Home

Reduce airborne contaminants to get air that's fresher, cleaner, and better to breathe

Cleaner Air Everywhere

Installed in the air duct of your HVAC system, the AirMaster purifies air at the source

Minimal Maintenance

Designed with UV and ozone lamps that require minimal maintenance

Contaminant Reduction

Lab tested to neutralize odors and reduce airborne bacteria and mold

Limited Lifetime Warranty

Get peace of mind with one of the most comprehensive warranties in the industry

AirMaster Ultra Features

Purification Over Filtration

Air filtration products work to “mechanically” trap large particles, which may not be as effective for smaller contaminants. Air purification addresses those tiny particles to provide air that is more deeply cleaned.

Easy to Use

LED indicators on the front of the unit provide a quick glance at operational status, and an optional remote status indicator is available for units that are installed in inaccessible areas, such as an attic.

Energy Efficiency

Uses less power than a standard light bulb, and operates only when air is flowing.

How the AirMaster Ultra System Works

The AirMaster Ultra is installed in the air duct in your home's heating/cooling system. The system works using two safe and time-tested technologies, ultraviolet light and ozone.

Air passes by the light of the UV lamp, where many common bacteria and molds are reduced.*

The air then passes by a specially designed lamp that produces a very small, controlled amount of ozone. Ozone is a strong oxidizer that reduces problem odors from cooking, pets and other sources, leaving behind fresher, cleaner air.

Whenever your heating/cooling system is on, the AirMaster Ultra works silently and continuously, leaving fresher, cleaner air throughout your home.

The only maintenance the AirMaster Ultra requires is periodically changing the UV and ozone lamps, a service that your RainSoft dealer will perform for you.

**Test performed by independent lab. Test results are available upon request.*

Benefits will be provided by various types of RainSoft equipment when installed and operated according to manufacturer's recommendations. Operational, maintenance and replacement requirements are essential for the product to perform as advertised. All claims based on best available information at time of printing. Manufacturer makes no representations as to the suitability of this equipment for a particular application. Buyer relies entirely on dealer's recommendations in the purchase of this equipment. Independent RainSoft dealers may include, together with your RainSoft product, a product or component that is not manufactured by RainSoft or their parent company, Aquion, Inc. Any non-RainSoft product may be covered by the manufacturer of that product, and is not covered by the RainSoft warranty. Aquion, Inc. does not warrant that your RainSoft product and the non-RainSoft product will perform properly when used together, and assumes no liability therefore.
