

EC5

WATER CONDITIONING SYSTEM

With RainSoft Remind Wireless App Connectivity

Help protect your home and feel the difference with softer water.

The EC5 Water Conditioning System softens, conditions, and filters your water to reduce calcium and magnesium - the two primary components of hard water - for luxuriously softened water throughout your home.

Lengthened Appliance Life

Reduce scale buildup throughout the entire home to help experience longer-lasting appliances

Softer, Cleaner Everything

Improved hair and skin, cleaner laundry and dishes, and better tasting foods and beverages

Wi-Fi Connected

Receive instant maintenance alerts from the system display and the RainSoft Remind App

Contaminant Reduction

Tested and certified to NSF/ANSI standard 44 for hardness reduction

Limited Lifetime Warranty

Get peace of mind with one of the most comprehensive warranties in the industry

EC5 Series Features

Intuitive Interactive Display

Easy to read and understandable system information is provided via a high resolution display.

Immediate Condition Response

Push any button to wake up the display and see the system status.

Energy Efficient

The DC power supply uses less electricity than conventional AC power supplies.

Power Outage Recovery

If power is lost during the regeneration process, the EC5 will automatically recover and complete the process once power is restored to reduce missed regeneration cycles.

Proportional Brine and Rinse

RainSoft's proportional brining feature saves on overall salt and water consumption with shorter regeneration cycles based upon specific household water usage.

How the EC5 Water Conditioner Works

Water enters RainSoft's exclusive rugged EC5 control valve and flows down through the conditioning resin where hard water particles are reduced through a process called ion exchange.

Once conditioned, cleaner, clearer, softer water exits the resin tank and flows throughout your home.

Based on your water usage, the unit will begin a night time regeneration when needed. Using salt*, the water hardness will be stripped from the resin bed and flushed down the drain. Once complete your system will return to service providing softened water to your home.

**Potassium chloride may be used instead of salt.*

RainSoft EC5 Water Conditioning Systems are UL listed. RainSoft EC5 Water Conditioning Systems are tested and certified to NSF/ANSI Standard 44 for the specific performance claims as verified and substantiated by test data. Refer to the manufacturer's Performance Data sheet for specific claims and certifications.

Benefits will be provided by various types of RainSoft equipment when installed and operated according to manufacturer's recommendations. Operational, maintenance and replacement requirements are essential for the product to perform as advertised. All claims based on best available information at time of printing. Manufacturer makes no representations as to the suitability of this equipment for a particular application. Buyer relies entirely on dealer's recommendations in the purchase of this equipment. Independent RainSoft dealers may include, together with your RainSoft product, a product or component that is not manufactured by RainSoft or their parent company, Aquion, Inc. Any non-RainSoft product may be covered by the manufacturer of that product, and is not covered by the RainSoft warranty. Aquion, Inc. does not warrant that your RainSoft product and the non-RainSoft product will perform properly when used together, and assumes no liability therefore.
